Waxing Treatment

We provide waxing treatments by using depilatory waxes composed of rosin and beeswax (regular wax) or rosin-free synthetic wax. Waxing is **NOT** a permanent hair removal although it pulls off hair from its root. You can expect hair regrowth between 2 to 4 weeks depending on the area, hair growth speed varies per person.

Please thoroughly review the handout we provided and follow the instructions to keep a comfortable waxing experience.

Please be advised we shall stop treatment or change the method of treatment if we find any contraindications or irritation on your skin or in your health condition.

Please feel free to let us know if you are feeling discomfort before, during, or after a waxing treatment. Contact us should you have any further questions or requests.

☐ I understand the waxing treatment and agree with your policy.
